Hi Isabel,

We have not heard anything about the request two weeks ago for the Powerex cross-hole and pressure-transducer data collected at the Cayuga Site last year. Can you ask for an update?

It looks like spring is finally starting to arrive up here!

Thanks,

—Dave

Subject: Pressure-transducer records Powerex wells at the Cayuga Site

Hi Isabel,

Would you please request the following raw-data files collected by GE and OBG at the Cayuga Site in 2009?

1. The binary data files for the pressure-transducer records for cross-hole hydraulic test configurations 1 through 8, which were conducted at Powerex and EPA wells during October-November 2009.
2. The binary data files for the pressure-transducer records for the B-49 cluster well on Pinckney Road, which was completed in spring 2009.

USGS will compile the data and distribute it to CDM and NYSDEC.

Thank you.
